DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Clifford Browning on 8/10/04.

In claims 1, 3 and 4; line 4: please delete "on the one hand" and insert "-" between "two" and "stages"

Allowable Subject Matter

2. Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance:

- The primary reason for the allowance of claim 1, 2, 7, 8/1, 8/2, 8/7, 9 and 10 is the inclusion of the limitation of an ink jet printing device for inks containing a high loading pigment comprising a re-circulation loop being separate from the feeding line and taking ink from the reservoir and returning it in the same reservoir again, while continuously mixing the ink through a re-circulation. It is limitation found in each claims, as it is claimed in the combination, that has

not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.

- The primary reason for the allowance of claims 3 and 8/3 is the inclusion of the limitation of an ink jet printing device for inks containing a high loading pigment wherein the print head feeding line comprises a filter placed between two static mixers, upstream of the print head and filter heating means arranged in such a manner that the ink temperature in the filter is higher than elsewhere in the print head supply line. It is a limitation found in each claim, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
- The primary reason for the allowance of claims 4-6 and 8/4-6 is the inclusion of the limitation of an ink jet printing device for inks containing a high loading pigment wherein the re-circulation loop comprises a re-circulation pump located between two static mixers. It is a limitation found in each claim, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
